

# Luis Vallejo

## Full-Stack Software Developer

• [luiavag@gmail.com](mailto:luiavag@gmail.com) • (+44) 0758-419-0056 • [luvagu.com](http://luvagu.com) • [github.com/luvagu](https://github.com/luvagu)

## Relevant Experience

### Full-Stack Developer @ Imporpernos

January 2014 - Present \\\ Quito, EC \ Remote

- Develop in-house helper tools that increment an employee's productivity on every-day tasks.
- Write complex SQL queries to extract specific data segments and/or generate specialized reports for accounting purposes.
- Collaborate with the marketing team to build effective landing pages.
- Continuously maintain, test and update the company's website and android app.

### Back-End Developer @ MyPriceRite

May 2013 - April 2015 \\\ Brighton, UK \ Remote

- As part of the back-end team we worked to integrate the Sphinx Search Server (an open source full-text server) with our database with the purpose of significantly improving the search performance of millions of products on our price comparison site.
- Developed and maintained PHP scripts that generated XML product data feeds for the affiliate program.
- Maintained and added features on our hosting services website.

### Back-End Developer @ Hiolo

November 2011 - February 2013 \\\ Scottsdale, AZ \ Remote

- Developed and maintained code to fetch product data from several drop-shippers APIs to ensure our database was always in sync.
- Wrote code that ran on intervals to collect product data from our database and exported it to the required format for the Google Commerce and Bing Shopping platforms.
- Integrated and maintained online payments with PayPal for the company's website using HTML, CSS, JavaScript, and PHP.

### Front-End Developer @ ZoneTronics

January 2010 - June 2011 \\\ Brighton, UK

- Here was the starting point of my career as web developer, a partnership for an online electronics e-commerce retailer.
- Edited and implemented features to a custom OpenCart theme.
- Wrote scripts in PHP to automate repetitive tasks and to bulk-upload data to a MySQL database.
- Contributed in building landing pages and newsletter templates using HTML/CSS and JavaScript.
