Relevant Experience

Full-Stack Developer @ Imporpernos

January 2014 - Present \\ Quito, EC \ Remote

- Developing in-house helper tools that increase an employee's productivity on everyday tasks.
- Writing complex SQL queries to extract specific data segments and/or generating specialized reports for accounting purposes.
- Collaborating with the marketing team to build effective landing pages.
- Continuously maintaining, testing and updating the company's website and android app.

Back-End Developer @ MyPriceRite

May 2013 - April 2015 \\ Brighton, UK \ Remote

- As part of the back-end team, we worked to integrate the Sphinx Search Server (an open source full-text server) with our database, with the purpose of significantly improving the search performance of millions of products on our price comparison site.
- Developed and maintained PHP scripts that generated XML product data feeds for the affiliate program.
- Maintained and added features on our hosting services website.

Back-End Developer @ Hiolo

November 2011 - February 2013 \\ Scottsdale, AZ \ Remote

- Developed and maintained code to fetch product data from several drop-shipping APIs to ensure that our database was always in sync.
- Wrote code that ran in intervals to collect product data from our database and exported it to the required format for the Google Commerce and Bing Shopping platforms.
- Integrated and maintained online payments with PayPal for the company's website using HTML, CSS, JavaScript, and PHP.

Front-End Developer @ ZoneTronics

January 2010 - June 2011 \\ Brighton, UK

- This was a partnership for an online electronics e-commerce retailer, the starting point of my career as a web developer.
- Edited and implemented features to a custom OpenCart theme.
- Wrote scripts in PHP to automate repetitive tasks and to bulk-upload data to a MySQL database.
- Contributed in building landing pages and newsletter templates using HTML/CSS and JavaScript.
